

2024 Pieceable Retreat Class Proposal  
Elsa Neubauer  
Quiltworx Certified Instructor

## **The Beach House**

This is the perfect pattern for a beach retreat. The Beach House combines a perfect log cabin with perfect flying geese with all their points in place. Assemble it together using curved piecing techniques. Using The Beach House Quiltworx pattern, the student will learn how to prepare and cut their fabric for use with Quiltworx techniques (cutting fabric strips, using templates to cut their fabric). They will be taught through demonstration how to organize their units and fabrics and piece onto foundation papers. This pattern features gentle curved piecing and floating points that result in a wall quilt (57" x 57") that is beautiful in any color scheme.

There will be multiple demonstrations of techniques throughout the course to demonstrate foundation paper piecing process, technology features of the pattern (smart corners and TRPs), trimming, sewing curves, how to fix a mistake when paper piecing and general cheerleading over their success. Students will have ample time to practice the skills demonstrated to reinforce their learning.

### **Supplies Needed**

The Beach House pattern – pattern is to be purchased from the instructor prior to the retreat ([papertrailquilting@gmail.com](mailto:papertrailquilting@gmail.com)). The pattern price will be discounted for attendees – price on page 2.

Fabric indicated for pattern – specific fabric requirements will be provided after signing up for the workshop – the pattern is designed for using 2 colorways. If you wish to do a 3 colorway version (such as the coral/turquoise/off white version) you will need to let me know when you purchase your pattern. (You will choose your own colors or can purchase kit from a variety of vendors nationwide – will gladly provide recommendations of reputable vendors for Quiltworx products – if purchasing a kit you must request the kit purchase **without** the pattern). This pattern is fat quarter friendly with some yardage necessary for the border. Do **not** starch your fabric for this project!

Paper piecing tools: 12" or 18" add-a-quarter ruler, 3" x 18" piece of template plastic, repositionable glue stick or school glue stick, fabric glue pen (such as Fons & Porter, Quilter's Select, etc.) and replacement glue, large paper clips (box of 100), gallon size ziploc bags, Acorn precision piecing solution. All of these items can also be purchased from me – let me know when you are ordering your pattern which items you will need and I will package it up and bring to the workshop with me!

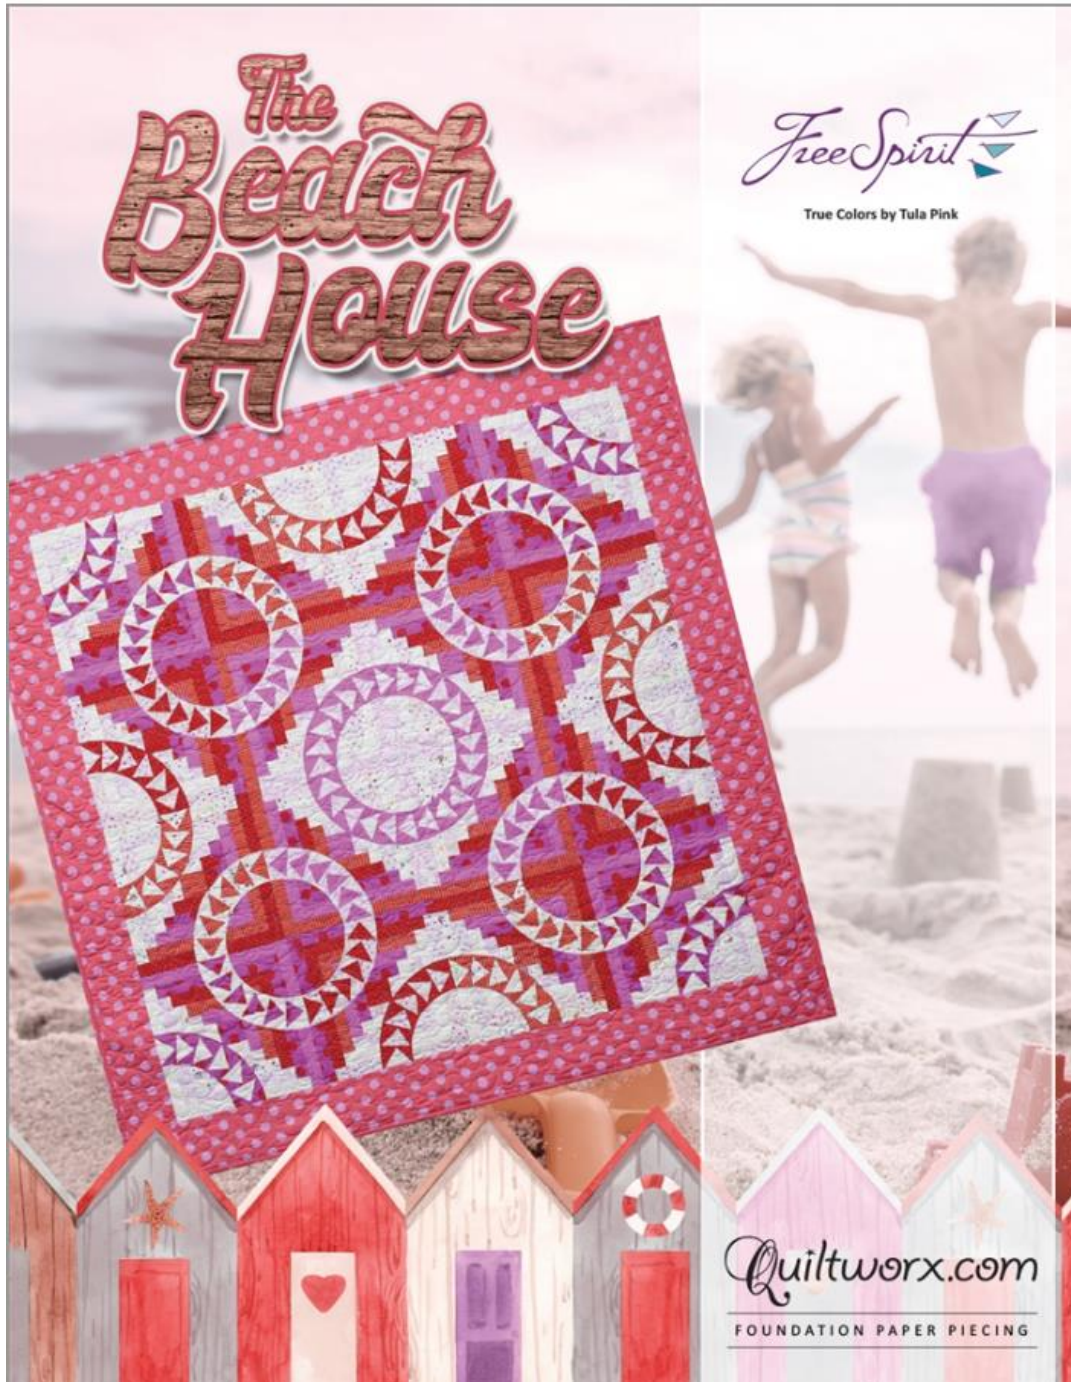

Basic Sewing supplies: #70 or 75 Microtex sewing machine needle, sewing machine, seam ripper, thread, scissors, rotary cutter and mat, etc.

**Class length:** 2 days

**Pre-class preparation:** Fabric and pattern need to be purchased prior to the class. Pattern papers will need to be prepped and fabric strips should be cut prior to class (instructions will be emailed to students when the class list is made available to the instructor).

I will bring a variety of Quiltworx patterns with me to sell. If there is a specific pattern that you would like to pre-order, let me know!
